

1. Shut off power before installation.
2. Fix the mounting strap to ceiling.
3. Attach resin antlers to the cover plate and fix with metal washers and nuts.
4. Connect wires to wires in the same color and install the light bulbs (not included in the light fixture).
5. Attach glass shade and cover plate with antlers onto the threaded rod (the shorter one) and screw the nut securely. Then, fix the resin finial to the threaded rod tightly.
6. Insert the main wire through the threaded rod (the longer one) and metal bracket, then feed the main wire through the side hole of the nut and connect main wire with wire connectors to the corresponding wire bundles.
7. Fix the threaded rod to the nut with side hole tightly. Then slide the antler centre pillar over the threaded rod.
8. Feed main wire through the chain connector and the mounting rod, then screw the chain connector onto the threaded rod, fixing the screw.
9. Attach mounting rod to the canopy and fix with screws.
10. Connect the main wire with the corresponding wires in ceiling and hang the canopy onto the mounting strap.
11. Turn on the power and test.
