

1. Shut off power before installation.
2. Fix the mounting strap to ceiling.
3. Feed the wire through the metal scroll, nut, threaded rod and base. Then, attach the metal scroll to the base, fixing the nuts. Insert the screw through small holes of the base and metal scroll and tighten the cap nut securely. Connect wires to wires matching their colors.
4. Insert threaded rods through the base and screw the bottom chain connectors onto the two sides of the base.
5. Connect the main wire with wire connectors to the corresponding wire bundles. Then, insert the main wire through one bottom chain connector.
6. Put on the cover plate and insert the long threaded rod through cover plate and the base, fixing ball nuts tightly.
7. Feed the main wire through chain, plastic nut, metal ball, top chain connector, threaded rod and canopy. Then, screw the top chain connector into the threaded rod and secure it to the canopy, fixing with washer and nut.
8. Connect main wire with wire connectors to the corresponding wires in ceiling.
9. Attach canopy to the mounting strap and fix with cap nuts.
10. Screw in light bulbs (not included with the light fixture). Install and lock light shade in place with metal clips.
11. Turn on the power and test.
